Dear Nick,

RE Abbott Construction

I thought, I would provide you with some feedback following the construction projects recently completed by Abbott.

Abbott completed a large and changeling contract to provide a new two storey teaching block and partial refurbishment of the existing school at Castilion Primary in 2013, expanding the school by 1 form of entry. Castilion Primary School was the third school project undertaken by Abbott Construction for London Borough of Bexley.

Throughout this construction project and the other school projects the construction was undertaken during occupation and school holiday periods, Abbott managed the works effectively to ensure that the works proceeded with minimal disruption to the school. Especially as this length and size of the projects were something the schools had never experienced before. This was achieved by working closely with the school and client to achieve zero disruption during the school day The project team communicated well with all parties and were proactive to ensure that the operation of the school was maintained at all times. For the client this is always an important of the project process.

The project was completed on time and to a very high standard. Abbott have demonstrated on all of the projects completed for London Borough of Bexley, that the quality of finish achieved and attention to detail is such that there is little snagging on completion and later defects are kept to a minimum. Abbott has always been proactive and obliging on the few occasions that there has been a requirement for them to return to site.

I would be pleased work with again and delighted to recommend Abbott Construction for any future work.

Regards

Jon Ruler
